

## **RAYFLEX PREMIER RANGE—BLACKOUT POULTRY CURTAIN**

“Snap On—Snap Off” Technology

### **The Rayflex Blackout Curtain—Featuring the bullet Suspension System For Ease Of Installation**

Following recent changes to legislation in the Poultry Industry:

Rayflex has launched a range of flexible black PVC strip in roll form, specifically design to meet the new legislation requirements.

Available from stock and delivered next day if required, Black PVC rolls are available in 2 dimensions:

- 200mm wide x 2mm thick x 50m long;
- 300mm wide x 3mm thick x 50m long;

Black PVC strip is suitable for use as blackout curtains and can be used extensively in all poultry houses.

It is featured on the bullet System. This is our preferred and recommended range for blackout applications, as it promotes ease of installation, maintenance and ongoing repair. However, it can be complemented by a more economical range of stainless steel suspension systems that would also be “fit for purpose”.

Black PVC strip is available to purchase online. The goods can be dispatched the same day if ordered pre-noon.

The bullet range blackout curtain is available to order by contacting our experienced sales team.
