

RAYFLEX PVC STRIP ROLLS & PVC SHEET

High Quality Extruded PVC Strip & PVC Sheet

What is PVC? Flexible PVC (polyvinyl chloride) is one of the oldest (1930) and most commonly used plastics.

It is extremely versatile, economically viable and can easily be recycled and reused. PVC granules are extruded and formed into strips and sheets offering a large choice over colour, style and dimensions.

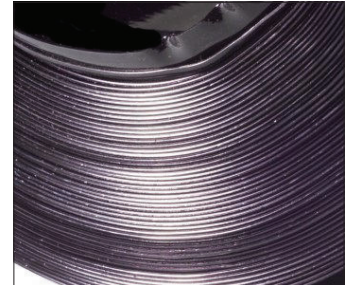

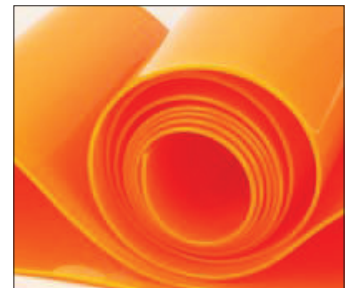

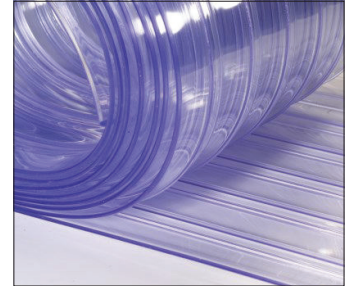

Our PVC guarantees high quality PVC Strip, with no "lakes" or "bubbles" and high degree of clarity that ensures clear visibility.

We are market leaders and manufacturers, utilising flexible PVC strip and sheet to create:

- Industrial PVC doors / curtains;
- Area partitions and protective screens;
- Machine covers;
- Floor covers;
- Furnishing protection;
- Various other industrial and domestic applications;

PVC strip & sheet is extensively used as it offers the following benefits:

- Temperature control energy savings;
- Health and Safety - effective barrier between warehouse and office / retail work areas;
- Noise reduction;
- Dust Reduction;
- Insect / Pest Protection;
